2. TYPICAL TRANSISTOR CIRCUIT- This is a silicon transistor circuit showing typical voltage values. When the forward base/emitter voltage is 0.6 to 0.7 V, the transistor is silicon. Germanium transistors will have a forward base/emitter bias voltage of 0.2 to 0.3 V This is a silicon transistor because 2.6 base volts minus 1.9 emitter volts equal a forward bias of 0.7 volts indicating a silicon ...

Electronic circuit simulation uses mathematical models to replicate the behavior of an actual electronic device or circuit. Simulation software allows for modeling of circuit operation and is an invaluable analysis tool. Due to its highly accurate modeling capability, many colleges and universities use this type of software for the teaching of electronics technician and electronics engineering ...

Electronic circuit simulation - Wikipedia

LTspice is freeware computer software implementing a SPICE electronic circuit simulator, produced by semiconductor manufacturer Linear Technology (LTC), now part of Analog Devices. It is used in-house at Linear Technology for IC design, and the most widely distributed and used SPICE program in the industry.

Audio circuits to build. The following links to circuit diagrams and building projects I have found from other web sites. I have tested only very few of them so there is no guarantee that those circuit will work as expected.

Reference Inverse RIAA What we need is a new modified RIAA reference curve to help us properly design phono equipment. I like using SPICE to simulate filter circuits and decided this would be a good way to generate a new standard.

The detector in itself is pretty simple, just some op-amps and a comparator. I decided to build it with all the bells and whistles so I included a digital potentiometer so you can adjust the reference voltage to the comparator via an SPI-bus.

The Balancer The GlassWare Balancer is the inverse of the GlassWare Unbalancer. Where the Unbalancer circuit accepts a balanced input signal and delivers an unbalanced (single-ended) output, the Balancer converts an unbalanced input signal into a balanced pair of output signals...
