Overview. The conceptualisation and operationalisation of pattern recognition are foundations of sport informatics and analytics. This theme (Theme 2 of the course): . Discusses systematic observation of performance.

Sport Informatics and Analytics/Pattern Recognition

Dr Adheesh Budree is a Senior Lecturer at University of Cape Town. He holds a BSc in Computer Science, Information Systems and Economics from University of Natal, Durban, a BSc Honours in Information Systems from University of South Africa, an MSc in Financial Economics from University of London, SOAS and a PhD in Information Systems from the University of the Western Cape.

Data Analytics: Online Short Course - Damelin Online

We define what is meant by big data. • We review analytics techniques for text, audio, video, and social media data. • We make the case for new statistical techniques for big data.

Beyond the hype: Big data concepts, methods, and analytics

Text mining, also referred to as text data mining, roughly equivalent to text analytics, is the process of deriving high-quality information from text. High-quality information is typically derived through the devising of patterns and trends through means such as statistical pattern learning. Text mining usually involves the process of structuring the input text (usually parsing, along with the ...

Text mining - Wikipedia

At the end of the course, the participants will be able to: Understand the emergence of business analytics as a competitive strategy. Understand the foundations of data science; the role of descriptive, predictive and prescriptive analytics in firms.

Top 10 Business Analytics Courses in India • Ranking 2015

Big data is big news. But what is big data, and how do we use it? Simply put, big data is data that, by virtue of its velocity, volume, or variety (the three Vs), cannot be easily stored or analyzed with traditional methods.

Big Data Foundations: Techniques and Concepts - lynda.com

Thanks to data analytics, enormous and increasing amounts of data are transforming our world. This course demonstrates how Google, the United States Postal Service, and Visa, among many others, are using new kinds of data, and new tools, to improve their operations.

Big Data: How Data Analytics Is Transforming the World

REQUIREMENTS FOR A MAJOR IN MATHEMATICS. Mathematics is the study of quantity, structure and space. While mathematics is important in understanding and influencing the physical world around us, mathematics can also be curiosity-driven and enjoyed without the requirement of a particular application.
