other D2D links active in the network. Comprehensive modeling and performance analysis of this clustered D2D network using tools from stochastic geometry is the main goal of this paper. A. Motivation and Related Work Modeling and analysis of D2D communication has taken two main directions in the literature.

1 Modeling and Performance Analysis of Clustered Device-to

The proposed, structured, process-modeling algorithm provides an effective way to design structured supply chain business processes. The second objective is to develop a network of inventory-queue models for the performance analysis and optimization of an integrated supply network with inventory control at all sites.

Title: Performance Analysis and Modeling of Parallel Applications in the Context of Architectural Routines Understanding the performance of applications on modern multi- and manycore platforms is a difficult task and involves complex measurement, analysis, and modeling. The Routine model is used to assess an application's performance

PERFORMANCE ANALYSIS AND MODELING OF PARALLEL

In Part II, the dual quaternion algebra is applied to the kinematic modeling of different types of robots, such as mobile robots, robot manipulators, cooperative systems, mobile manipulators, and ...

INTRODUCTION TO MODELING AND SIMULATION Anu Maria ... Binghamton, NY 13902-6000, U.S.A. ABSTRACT This introductory tutorial is an overview of simulation modeling and analysis. Many critical questions are answered in the paper. What is modeling? What is ... simulation is a tool to evaluate the performance of a system, existing or proposed, under ...

Introduction to Modeling and Simulation

Performance Modeling and Analysis - overview. Performance modeling and analysis has been and continues to be of great practical and theoretical importance in research labs in the design, development and optimization of computer and communication systems and applications.
