Toeplitz and Circulant Matrices: A review

The Journal of Mathematical Analysis and Applications presents papers that treat mathematical analysis and its numerous applications. The journal emphasizes articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, and engineering, particularly those that stress analytical aspects and novel problems and their solutions.

In mathematics, the Wronskian (or Wroński,skian) is a determinant introduced by Józef Hoene-Wroński () and named by Thomas Muir (1882, Chapter XVIII).It is used in the study of differential equations, where it can sometimes show linear independence in a set of solutions.

Wronskian - Wikipedia

Gaussian Processes and Kernel Methods Gaussian processes are non-parametric distributions useful for doing Bayesian inference and learning on unknown functions. They can be used for non-linear regression, time-series modelling, classification, and many other problems.
